

FOR IMMEDIATE RELEASE:

Texas Radiology Practice Chooses Evolutions For Advanced Billing Solutions

St. Louis, MO, April 17, 2007 — Tom Long, President and CEO of Evolutions, a leading national practice management and medical billing solutions provider, announced today that Dr. Charles M. Myers, a radiologist in Mineral Wells, Texas, has selected the company for its complete line of billing services.

Evolutions' billing solutions entail much more than producing bills for medical providers. The company's enhanced billing solutions, which are totally HIPAA-compliant, have reduced days in A/R for many clients. Payment denials have been reduced due to the company's unique claims data scrubber that checks for missing data elements, transpositions and illogical information. Professional coders ensure that coding is at the appropriate and correct level.

"Evolutions has been serving the billing and collection needs of healthcare providers for over 32 years," explained Long. "We look forward to providing Dr. Myers and his practice with the same quality and service our clients have come to know over the years."

Evolutions utilizes GE Centricity[®] as its interface engine, which allows the company to interface with virtually any medical information system capable of generating anything from a flat file to an HL7 file. By capturing demographics electronically, the potential for data entry errors is significantly reduced.

About Evolutions

Evolutions can trace its history back 35 years. The company provides practice management services, document management solutions and comprehensive medical billing solutions that are HIPAA-compliant and reviewed by certified coders. Evolutions also uses state-of-the-art electronic claims submission and offers an aggressive accounts receivable management program that guarantees to exceed the national average collection standards. The company operates on an at-risk basis, and no capital expenditure is required for clients.
